

ABSTRACT OF DISCLOSURE

199919

A heavy duty weigh scale including a rectangular weighing platform constructed of parallel and spaced apart I-beams, which platform is carried above ground with at least one stand supporting an I-beam of the platform. The stand having a pair of spaced apart upright supports of approximately the same length for supporting a load cell. The weight of the platform and object being weighed being directed to the load cell through a weight-transfer link connected to the platform. The weight-transfer link being located in a cut-out opening provided in the web of the I-beam supported by the stand.
